

Where Can I Find Examples?

From OpenDSSWiki

Question

I was wondering if you had any example files to use to better familiarize myself with the software?

I've read your OpenDSS level 1 and level 2 Introductory training (<http://electricdss.svn.sourceforge.net/viewvc/electricdss/Training/>), and used the examples present in the file's download folder but some other examples would be extremely helpful.

Answer

There are many examples posted on the sourceforge website. I understand that they are not always easy to find. Therefore, I have prepared some direct links to different parts of the OpenDSS site on EPRI's Smartgrid site.

[1] (<http://smartgrid.epri.com/SimulationTool.aspx>)

You can also get to the OpenDSS Discussion Forum from there.

You can find the OpenDSS versions of the IEEE Test Feeders and the EPRI Test Circuits through those links.

[2] (<http://svn.code.sf.net/p/electricdss/code/trunk/Distrib/Examples/>)

If you don't have the capability to compile the source code yourself, the latest beta builds that corresponds to the latest source code is posted here:

<http://svn.code.sf.net/p/electricdss/code/trunk/Distrib/x86/>

<http://svn.code.sf.net/p/electricdss/code/trunk/Distrib/x64/>

Let me encourage you to be a free thinker and not be limited to what OpenDSS can presently do. Hopefully, you will be inspired to go beyond what we have done.
